SUMMARY

- Enthusiastic researcher, working at the intersection of Deep Learning and Systems
- Current research on optimizing DNNs (Pruning, Quantization, Neural Architecture Search) with respect to hardware (TPU-like, Multi-core CPU, GPU) and DNN accelerator algorithm co-design
- Former Deep Learning Research Intern at Intel's Graphics Processing Research team. Former Deep Learning Intern at AMD's DNN Graph optimization team

EDUCATION

Iowa State University

PhD in Computer Engineering. 3.55/4.0

Advisor: [Dr. Arun K. Somani](#)

Ames, Iowa, USA

Aug 2017 - Present

University College of Engineering, Osmania University

Bachelor of Engineering in Electronics and Communication. 8.4/10

Hyderabad, India

Sept 2013 - May 2017

ACADEMIC/PROFESSIONAL EXPERIENCE

Iowa State University

Graduate Research Assistant, [Dependable Computing and Networking Laboratory](#)

Ames, IA, USA

May 2018 - Present

My research involves optimization of DNNs for efficient inference on different hardware systems, co-design, and reliability of DNN accelerators. My current/previous research projects are as follows:

1. **Array Aware Architecture Search:** Design of a joint search algorithm for Architecture, Quantization and Array Accelerator supporting different precision (In progress). Simulators: SCALE-Sim and Bitfusion
2. **Review Paper:** A Comprehensive review of Pruning, Quantization, Neural Architecture Search from a hardware perspective (In progress for a publication in ACM Computing Survey Journal)
3. **Array Aware Pruning/Training:** Designed a Pruning algorithm and a Hyperparameter tuning method for CNN, MLP networks to minimize computation cycles of DNN forward pass on Array-based Neural Network Accelerators (TPU, Eyeriss) based on the hardware size. Simulator Used: SCALE-Sim
4. **CPU, GPU Dimension Aware Pruning:** Developed a combined Node Pruning, Symmetric Quantization, and layer fusion method based on Multi-core CPUs and Tensor Cores GPUs for efficient inference
5. **Model Compression on Faulty DNN Accelerator:** Developed a joint pruning method on an array-based accelerator to bypass faults and compress weights for efficient inference under different faulty modes

Intel Corporation

Research Scientist Intern, [Graphics Processing Research Lab](#)

Worked on Neural Architecture Search for Network design and Mixed Precision Quantization related to Image Restoration tasks (Super Resolution and Denoising) and Graphics applications

Santa Clara, CA, USA

June 2020 - Dec 2020

Advanced Micro Devices (AMD)

Machine Learning Intern, [MIGraphX](#)

Worked in the MIGraphX (GPU graph optimization) team to design compression algorithms for enhancing performance on AMD GPUs at inference run-time. Developed quantization techniques to convert the weights of CNN from floating-point to integer precision on CNN benchmarks like Vgg16, ResNet50, Inception

Austin, TX, USA

May 2019 - Aug 2019

Iowa State University

Graduate Teaching Assistant, Digital Logic Design

Responsibilities: Supervising labs, mentoring students on Verilog, FPGAs and technical projects

Ames, IA, USA

Aug 2017 - April 2018

PUBLICATION(S) - SUBMITTED/ACCEPTED

1. **K. T. Chitty-Venkata** and A. Somani, "Array Aware Neural Architecture Search" in IEEE ASAP 2021 Conference (Submitted; Under review)
2. **K. T. Chitty-Venkata** and A. Somani, "Hardware Dimension Aware Pruning" in IEEE Transactions on Computers Journal (Submitted; Under review)
3. **K. T. Chitty-Venkata**, S. Kothandaraman and A. Somani, "Searching Architecture and Precision for U-net based Image Restoration Tasks" in IEEE ICIP 2021 Conference (Accepted)
4. **K. T. Chitty-Venkata** and A. Somani, "Calibration Data-Based CNN Filter Pruning for Efficient Layer Fusion" in IEEE HPCC-DSS 2020 Conference [[Paper](#)]
5. **K. T. Chitty-Venkata** and A. Somani, "Model Compression on Faulty Array-based Neural Network Accelerator" in IEEE PRDC 2020 Conference [[Paper](#)]
6. **K. T. Chitty-Venkata** and A. Somani, "Array Aware Training/Pruning: Methods for Efficient Forward Propagation on Array-based Neural Network Accelerators" in IEEE ASAP 2020 Conference [[Paper](#)]
7. **K. T. Chitty-Venkata** and A. Somani, "Impact of Structural Faults on Neural Network Performance" in IEEE ASAP Conference 2019 [[Paper](#)]

COURSE WORK (GRAD SCHOOL)

- **Hardware:** Computer System Architecture, Applications of Parallel Computing (CS267 UC Berkeley), Design and Analysis of Algorithms, Fault Tolerant Computing, Real Time Systems, Communication Systems
- **Machine Learning:** Probabilistic Methods, Statistics Theory for Research, Deep Learning, Machine Learning, Statistical Methods for Machine Learning

SKILLS

- **Programming:** C, C++, Python, Matlab
- **Parallel Programming:** CUDA, OpenMP, working knowledge of MPI
- **Machine Learning Frameworks:** Tensorflow, Pytorch, Keras, Scikit Learn
- **Other:** Linux, Shell Scripting, Verilog HDL, FPGA, Gem5 and ZSim Simulators, HTML

RELEVANT ACADEMIC PROJECTS

- **Reinforcement Learning using Neural Networks:** Designed and implemented Q-learning algorithm using DNNs as function approximator for acrobat-v1, an environment taken from OpenAI gym
- **High Performance Cache Simulation on GPU:** Developed a CPU-GPU based cache simulator and compared it with traditional CPU-only simulation. Developed the simulator using C (for CPU-only) and CUDA C (for CPU-GPU). CPU-GPU cache simulation performed better than CPU-only simulation
